

PAC-MAN SMASH

Operation Manual

The actual product may differ slightly from the illustrations in this Operation Manual.

WARNING

- To ensure safe operation of the machine, be sure to read this Operation Manual before use.
- Keep this Operation Manual in a safe place for quick access whenever needed.

NAMCO BANDAI Games Inc.

Introduction

Thank you very much for purchasing PAC-MAN SMASH (referred to as “the machine” in this manual).

This Operation Manual describes:

- How to safely install, move, transport, operate, service and dispose of the machine.
- How to make full use of the machine’s functions and operate it correctly.
- How to ensure the safety of players and bystanders.

Contact for this machine and machine repair inquiries

- For inquiries regarding the machine or machine repairs, contact your distributor.

Instructions to the Owner

If you delegate the work for installing, moving, transporting, operating, servicing or disposing the machine to other people, ensure that these people read the relevant sections of this operation manual carefully before starting work, and observe the corresponding precautions.

1-1 Levels of Risk

The safety and property damage precautions on the machine labels and in this Operation Manual are classified according to their risk level, as follows.

 **WARNING** : Failure to avoid these risks may result in serious injury or death.

 **CAUTION** : Failure to avoid these risks may result in light injury or damage to other property.

Notes about functionality that are not linked to safety are indicated with the following symbol.

 **NOTICE** : Information about product functions or protection.

1-2 Definition of "Technician"

This Operation Manual is designed for arcade personnel. However, the sections marked "Must be performed by a technician" in the Table of Contents are written for technicians. These tasks must be performed by technicians only.

Technician: A person involved in design, manufacture, inspection or service at an amusement device manufacturer, or a person involved routinely in the service or management (such as repair) of amusement devices and who has specialist knowledge of electricity, electronics or mechanical engineering equivalent to or higher than a technical high school graduate.

Levels of Risk / Definition of "Technician"

Troubleshooting

1-3 Critical Safety Precautions

WARNING

- Should an abnormality occur, turn off the power switch immediately to stop operations. Then, be sure to disconnect the power cord plug from the outlet. Operating the machine while the abnormality persists may result in a fire or accident.
- This machine includes important parts used to ensure the safety of players and bystanders. Operating the machine while these “important parts for ensuring player and bystander safety” are broken, damaged or deteriorated, or with defective installation may result in an injury to the players or bystanders. If you discover an abnormality, replace the affected part immediately. To order parts, contact your distributor.
- Dust accumulating on the power cord plug may result in a fire. Inspect the plug regularly and remove any dust.
- Fully insert the power cord plug into the outlet. Poor contact may generate heat and result in a fire or burns.
- Damage to the power cord may result in a fire, electric shock or electrical leakage. Be sure to observe the following.
 - Keep the power cord away from heaters.
 - Do not twist the power cord.
 - Do not forcibly bend the power cord.
 - Do not alter the power cord.
 - Do not pull the power cord. (Always unplug by holding the plug and not the power cord.)
 - Do not bundle the power cord.
 - Do not place objects on the power cord.
 - Do not allow the power cord to be caught between the machine and other devices or the wall.
 - Do not do anything else that might damage the power cord.
- Do not expose the power cord and power cord plug to water. It may result in electric shock or electrical leakage.
- Do not touch the power cord plug with wet hands. It may result in electric shock.
- The power capacity of the machine is AC 120 V (or 220 V), maximum current consumption 3 A. To prevent fire and electric shock, use indoor wiring that conforms to these power supply specifications.
- Use a power supply voltage range of AC 110 V to 130 V (or 210 V to 230 V). Using a voltage outside this range may result in a fire or electric shock. However, to ensure that the machine operates in the optimum condition, keep the voltage at AC 120 V (or 220 V) as much as possible.
- To ensure safe use of the machine, be sure to perform the pre-operation inspection (See “7-4 Pre-operation Inspection” on page 35.) and service (See “8B Service” on page 109.). Omitting these inspections or service may result in an accident.
- Use the consumables and service parts (including screws) that are specified by NAMCO BANDAI Games Inc. To order parts, contact your distributor.
- Do not modify the machine without permission. Do not perform any operations that are not described in this Operation Manual. Modifying the machine may create unforeseen hazards.
- If you decide to transfer ownership of this machine, be sure to provide this Operation Manual with the machine.

1-4 Machine Warning Labels

! WARNING

- The warning labels attached to the machine contain important information for ensuring safety. Be sure to observe the following.
 - To ensure that the warning labels attached to the machine are always clearly visible, install the machine in an appropriate location with ample illumination and keep the labels clean at all times. Make sure that the labels are not hidden by other machines or objects.
 - Do not remove or alter the warning labels.
 - If a warning label becomes excessively dirty or damaged, replace it with a new one. To order warning labels, contact your distributor.

5. Installation

WARNING

- Install the machine according to the instructions in this Operation Manual. Failure to follow these instructions may result in a fire, electric shock, injury or malfunction. (See “8A Installation and Assembly” on page 74.)
- Install the machine securely by using the level adjusters. Unstable machine installation may result in an accident or injury. (See “8A-2-2 Level Adjuster Adjustment” on page 90.)
- Fully insert the power cord plug into the outlet. Poor contact may generate heat and result in a fire or burns.
- Be sure to install the ground wire. Failure to install the ground wire may result in electric shock in the event of electrical leakage. (See “8A-3 Connecting the Power Cord and Ground” on page 106.)

5-1 Installation Conditions

5-1-1 Installation Locations to Avoid

WARNING

- The machine is designed for indoor use. Do not install the machine outdoors. Also, never install the machine in the following locations.
 - A location exposed to direct sunlight
 - A location exposed to rain or water leaks
 - A damp location
 - A dusty location
 - A location close to heaters
 - A hot location
 - An extremely cold location
 - A location exposed to condensation caused by temperature differences
 - A location that obstructs an emergency exit or fire extinguishing equipment
 - An unstable location or a location exposed to vibration

5-1-2 Play Zone for the Installed Machine

CAUTION

- Create a play zone around the machine so that players do not bump into bystanders or passersby.

NOTICE

- Leave a space of 100 cm or more between the machine and the wall or other machines so that parts can be removed when performing service work.
- A ceiling height of 2 m 10 cm or more is required.

5-2 Required Dimensions for the Delivery Route (Such as Doors and Corridors)

Entranceways and the delivery route must be larger than the dimensions noted below.

● Table

Width (W) 2,570 x Depth (D) 1,690 x Height (H) 1,350 [mm]

Weight 280 kg

In addition, the table can be disassembled as follows. (Condition when shipped from the factory)

• Table top assembly

Width (W) 2,080 x Depth (D) 1,490 x Height (H) 120 [mm]

Weight 95 kg

• Cabinet (L) assembly (without net L and S)

Width (W) 1,530 x Depth (D) 1,240 x Height (H) 840 [mm]

Weight 85 kg

• Cabinet (R) assembly (without net L and S)

Width (W) 1,530 x Depth (D) 1,240 x Height (H) 840 [mm]

Weight 75 kg

● Side tower assembly

Width (W) 960 x Depth (D) 1,030 x Height (H) 2,050 [mm]

Weight 115 kg

The side tower assembly can be further disassembled as follows. (Condition when shipped from the factory)

• Side tower cabinet

Width (W) 920 x Depth (D) 620 x Height (H) 1,700 [mm]

Weight 90 kg

• Hopper assembly

Width (W) 880 x Depth (D) 520 x Height (H) 530 [mm]

Weight 25 kg

6. Moving and transporting

! WARNING

- Do not leave the machine on a slope. It may fall over or result in an accident.

6-1 Moving (On the Same Floor)

NOTICE

- Move the machine carefully to avoid damaging it.
- Do not exert force on the plastic parts when moving the machine.
- When moving the machine, be sure to raise the level adjusters to their highest level.
- Be sure to turn off the power switch before starting work.
- Handle the power cord carefully.

6-2 Transporting

6-2-1 Transporting Manually (Such as Carrying on Stairs)

WARNING

- Before transporting the machine manually, be sure to disassemble it into the table and side tower assembly, and disassemble the hopper assembly from the side tower assembly for easier carrying. Straining yourself by attempting to transport the fully assembled machine may result in an accident or injury.
- Disassemble the table in accordance with the delivery route. (See “5-2 Required Dimensions for the Delivery Route (Such as Doors and Corridors)” on page 26.)
- When transporting the machine by hand, be sure to use the following number of people. Straining yourself may result in an accident or injury.

- Table (280 kg): 12 people or more

- Side tower cabinet (excluding the hopper assembly: 90 kg): 4 people or more

- Hopper assembly (25 kg): 2 people or more

! WARNING

● When transporting the machine by hand, be sure to use the following number of people. Straining yourself may result in an accident or injury.

[When the table is disassembled]

- Table top assembly (95 kg): 4 people or more
- Cabinet (L) assembly (85 kg): 4 people or more
- Cabinet (R) assembly (75 kg): 4 people or more

- Goal (L) assembly (17 kg): 2 people or more
- Goal (R) assembly (17 kg): 2 people or more

NOTICE

● Do not subject the machine to impact while lowering it.

Test Mode

Troubleshooting

6-2-2 Loading and Unloading to and from a Vehicle

WARNING

- When using a forklift to transport the machine, observe the following. Failure to observe the following instructions may result in an accident, such as the machine falling over.
 - Be sure to insert the fork into the specified positions.
 - Make sure that the machine is balanced properly during transportation.

NOTICE

- Do not subject the machine to impact while lowering it.

6-2-3 Transporting on a Vehicle

! WARNING

● When transporting the machine on a vehicle, secure the machine firmly so that it does not move during vehicle transport. Failure to secure the machine may result in an accident.

NOTICE

- Do not subject the machine to impact while lowering it.
- Remove any pucks from inside the side tower cabinet when transporting the machine.
- When securing the machine with a rope, observe the following.
 - Be sure to secure the machine with the rope or belt in the position shown in the figure below.
 - Place blankets or other shock absorbing material between the machine and the rope or belt to protect the machine surfaces.
- Place Styrofoam or other shock absorbing material between the machine and the truck bed and any other equipment or items to protect the machine surfaces.
- When transporting the machine in rainy weather, use a vehicle with a cargo cover, a container truck, or similar vehicle to protect the machine from direct exposure to rain.

7. Operation

WARNING

- Should an abnormality occur, turn off the power switch immediately to stop operations. Then, be sure to disconnect the power cord plug from the outlet. Operating the machine while the abnormality persists may result in a fire or accident.
- Dust accumulating on the power cord plug may result in a fire. Inspect the plug regularly and remove any dust.
- Fully insert the power cord plug into the outlet. Poor contact may generate heat and result in a fire or burns.
- Before operating the machine, be sure to check that installation has been performed according to the instructions and specified procedures (See “5 Installation” on page 24.) in this Operation Manual. Failure to install the machine correctly may result in a fire, electric shock, injury or malfunction.
- The warning labels attached to the machine contain important information for ensuring safety. Be sure to observe the following. (For the warning label locations, see “1-4 Machine Warning Labels” on page 3.)
 - To ensure that the warning labels attached to the machine are always clearly visible, install the machine in an appropriate location with ample illumination and keep the labels clean at all times. Make sure that the labels are not hidden by other machines or objects.
 - Do not remove or alter the warning labels.
 - If a warning label becomes excessively dirty or damaged, replace it with a new one.
To order warning labels, contact your distributor.
- To ensure safe use of the machine, be sure to perform the pre-operation inspection (See “7-4 Pre-operation Inspection” on page 35.) and service (See “8B Service” on page 109.) described in this Operation Manual. Omitting these inspections or service may result in an accident.

NOTICE

- Due to the nature of this product, the mallets and pucks may get stolen. If possible, install and operate the machine in a location where it can be observed by venue staff.
- Mallets and pucks may be left on the playing field after game play has finished. In these cases, return the mallets to the mallet holders, and place the pucks inside the goals.
- Caution players and bystanders not to place drinks or other items on the playing field. In the event that drinks are spilled onto the machine by accident, wipe away any liquid immediately.

7-1 People Who Should Avoid Playing

WARNING

- To ensure the safety of players, be careful not to let the following types of people play. Otherwise, this may result in an accident.
 - People who disregard the warning labels attached to the machine

7-2 Safety Precautions for Playing

WARNING

- If you discover anyone behaving as follows, be sure to caution them. Otherwise, this may result in an accident.
 - A person other than the player in the play zone
- Make sure that players do not perform the following actions, as this may cause pucks to fly out of the machine and strike people or otherwise result in injury or an accident.
 - Striking pucks with more power than is necessary
 - Striking pucks while off-balance, leaning in or an otherwise unstable body posture
 - Using items other than the supplied mallets and pucks

CAUTION

- Make sure that players do not perform the following actions, as this may result in injury or an accident.
 - Holding mallets by the circumference.
 - Placing hands not holding a mallet in the playing field.
 - Placing hands inside the goal holes.
- Accessories such as necklaces and bracelets, neckties, wristwatches, small items in breast pockets and other loose items may fall and enter the goals as a result of vigorous movements during game play. Instruct players to remove these items before playing in order to prevent damage or an accident. Otherwise, this may result in an accident.

7-3 Important Parts for Ensuring Player and Bystander Safety

WARNING

- This machine includes important parts used to ensure the safety of players and bystanders. Operating the machine while these “important parts for ensuring player and bystander safety” are broken, damaged or deteriorated, or with defective installation may result in an injury to the players or bystanders. If you discover an abnormality, replace the affected part immediately. To order parts, contact your distributor.

Side wall
Part No.: 731-448

This part is used to keep pucks from flying out of the machine during game play.

Net S
Part No.: 731-338

This part is used to keep pucks from flying out of the machine during game play.

Center guard
Part No.: 731-332

This part is used to keep pucks from flying towards the opponent's side during game play.

Net L
Part No.: 731-337

This part is used to keep pucks from flying out of the machine during game play.

7-4 Pre-operation Inspection

Check the items below before starting machine operations. If there is an abnormality, resolve it by referring to “8B-3 Troubleshooting” on page 130.

7-4-1 Safety Inspection Items (Before Power On)

WARNING

- Before operating the machine, check the following locations. This is required to prevent accidents or injury.

- (1) Are all warning labels in place? (See “1-4 Machine Warning Labels” on page 3.)
- (2) Are all warning labels legible? (See “1-4 Machine Warning Labels” on page 3.)
- (3) Are all level adjusters adjusted properly? (See “8A-2-2 Level Adjuster Adjustment” on page 90.)
- (4) Is the specified play zone provided? (See “5-1-2 Play Zone for the Installed Machine” on page 25.)
- (5) Is the power cord laid out safely so that it will not cause players or other customers to trip over it?
- (6) Is the power cord securely connected to the outlet and the power supply input of the machine? (See “8A-3 Connecting the Power Cord and Ground” on page 106.)
- (7) Is the power cord plug free from dust?
- (8) Are the mallets damaged?
- (9) Are the mallet grips loose?
- (10) Are the net S, net L, center guard or side guards damaged? (See “7-3 Important Parts for Ensuring Player and Bystander Safety” on page 34.)
- (11) Are the goal covers or corner covers damaged?
- (12) Are the guide L or guide R damaged?

Inspect the following items after turning on the power switch. If you discover an abnormality, turn off the power switch immediately to stop operations. Then, disconnect the power cord plug from the outlet and contact your distributor.

- (13) Is any part of the power cord or plug abnormally hot?
- (14) Does touching the machine give a tingling electric shock?
- (15) Is there a burning smell, abnormal noise or vibration?
- (16) Is there any other abnormality or malfunction?

Important Parts for Ensuring Player and Bystander Safety / Pre-operation Inspection

Test Mode

Troubleshooting

7-4-2 Function Inspection Items (After Power On)

- (1) Check the lights. (Do the score LED, time LED and circle LED light up?)
(See "7-8-2 Score LED, Time LED and Circle LED Test" on page 42.)
- (2) Check the switch inputs.
(See "7-8-3 Switch Input Test" on page 43.)
- (3) Check the blower fan.
(See "7-8-4 Blower Fan ON/OFF Test and Sensor Check" on page 45.)
- (4) Check each solenoid.
(See "7-8-5 Solenoid ON/OFF Test and Sensor Check" on page 46.)
- (5) Check the L hopper motor operation.
(See "7-8-6 L Hopper Motor ON/OFF Test and Sensor Check" on page 47.)
- (6) Check the S hopper motor operation.
(See "7-8-7 S Hopper Motor ON/OFF Test and Sensor Check" on page 48.)
- (7) Check the audio. (Is sound produced by each speaker?)
(See "7-8-8 Sound Test" on page 49.)
- (8) Check the mini pucks. (Are there ten mini pucks in each of the mini puck stock areas on the right and left?)
(See "7-8-7 S Hopper Motor ON/OFF Test and Sensor Check" on page 48.)

7-5 Opening and Closing Doors

7-5-1 Opening and Closing the Selector Door

- 1 Use the supplied selector door key to open the selector door.

- 2 To close the door, perform the procedure in reverse.

7-5-2 Opening and Closing the Coin Box Door

- 1 Use the supplied cash box key to open the coin box door.

- 2 To close the door, perform the procedure in reverse.

Troubleshooting

7-5-3 Opening and Closing the Goal (L) and (R) Assemblies

The description below explains how to open and close the (L) side. Follow the same procedure to open and close the (R) side.

- 1** Use the supplied service key to unlock the lock (①) on the left side of the goal (L) assembly, and then remove the service key from the lock.
- 2** Insert the removed service key into the lock (②) on the right side of the goal (L) assembly, unlock the lock, and then open the goal (L) assembly.

- 3** To close the door, perform the procedure in reverse.

7-6 Explanation of the Power Switch and Adjustment Switches

7-6-1 Turning the Power Switch On

- After completing the installation work, turn on the power switch.
- When turning the power switch on and off, wait 30 seconds or more between operations. Do not turn the power switch on and off needlessly. It may corrupt the contents of the backup memory.

7-6-2 Adjustment Switches

The adjustment switches are located inside the selector door.

Select switch

In Test mode, flip this switch up or down to select an item or setting (numerical value).

Audio volume

This adjusts the speaker volume.
Turn counter-clockwise to decrease the volume.
Turn clockwise to increase the volume.

Test switch

Set this switch to ON to enter Test mode. This is used to test each part of the machine, such as the switch input test, in the Test mode. (See "7-8 Test Mode" on page 41.)

Service button (red)

Press this button to increase the credit count without operating the coin counter.

Enter button (green)

After selecting an item or setting (numerical value) with the Select switch, press this button to enter or execute the selection.

7-7 Playing the Game

This machine is an air hockey game where players use mallets to hit pucks supplied automatically during the set time into the opponent's goal to score points.

- (1) The start sound is output, then a big puck is supplied to the playing field. At the same time, the time LED blinks.
- (2) Players use the mallets to hit the big puck towards the opponent's goal.
- (3) When the big puck enters a goal, 100 points are added to the score LED of the scoring player, and the goal sound (ascending musical scale) is output three times from the speaker on the side where the goal was scored.
- (4) A big puck is supplied to the playing field on the side where the goal was scored.
- (5) 20 mini pucks are supplied to the game all at once at random times during game play and toward the end of game play.
- (6) When a mini puck enters a goal, 30 points are added to the score LED of the scoring player and the goal sound (ascending musical scale) is output one time.
- (7) The countdown sound is output starting from 10 seconds before the game ends. When the end whistle is output, the game ends and subsequent goals are not added to the score.

*The number of mini puck supply times varies according to "7-9-4 Big Bang Mode play time", "7-9-6 Mini puck supply frequency more/less setting for Big Bang Mode" and the goal status during game play.

7-7-1 Starting the Game and Game End

- (1) Insert a number of coins equal to the set game cost into the coin slot.
- (2) When the set time is exceeded, the game ends.
The set time may be extended slightly depending on the number of mini puck supply times.

7-8 Test Mode

The machine displays the test contents on the signboard that displays the score and timer.

7-8-1 Test Item Selection Mode

- 1** Use the supplied service key to open the selector door and set the Test switch to ON (slide the switch upward) to enter the Test Item Selection Mode. (See "7-6-2 Adjustment Switches" on page 39.)
- 2** Flip the Select switch up and down to select the item.
- 3** Perform the test for each item.
- 4** After finishing all the tests, set the Test switch to OFF.

- Before setting the Test switch to OFF, make sure that there are ten mini pucks in each of the mini puck stock areas on the right and left.

7-9-3 Number of plays per game

Setting item selection display (Number of plays per game)

- 1** In this Setting Item Selection Mode, "PLAY" is displayed in the left side score LED and the number of plays is displayed in the right side score LED.
- 2** Press the Enter button (green). The right side score LED display blinks and the machine enters the Setting Change Mode.
- 3** In the Setting Change Mode, flip the Select switch up and down to change the value.
 - The values that can be set are 1, 2, 3, 4, 5, 6, 7, 8 and 9.
 - Flip the Select switch up to increase the value. The value returns to 1 after 9.
 - Flip the Select switch down to decrease the value. The value returns to 9 after 1.
 * The default setting (factory setting) is "1".
- 4** Press the Enter button (green) again to return to the Setting Item Selection Mode.

7-9-4 Big Bang Mode play time

Setting item selection display (Big Bang Mode play time)

- 1** In this Setting Item Selection Mode, “b-PL” is displayed in the left side score LED and the play time (seconds) is displayed in the right side score LED.
- 2** Press the Enter button (green). The right side score LED display blinks and the machine enters the Setting Change Mode.
- 3** In the Setting Change Mode, flip the Select switch up and down to change the value.
 - The values that can be set are 60, 70, 80, 90, 100, 110, 120, 130, 140, 150, 160, 170, 180, 210, 240, 270 and 300.
 - Flip the Select switch up to increase the value. The value returns to 60 after 300.
 - Flip the Select switch down to decrease the value. The value returns to 300 after 60.
 - When a longer time is set than the Normal Hockey Mode play time, the Normal Hockey Mode play time is changed to the same time as the Big Bang Mode play time.

* The default setting (factory setting) is “70”.
- 4** Press the Enter button (green) again to return to the Setting Item Selection Mode.
*In Big Bang Mode, the set time may be extended slightly depending on the goal status.

7-9-9 Mini puck low warning ON/OFF

This function informs when the number of mini pucks has decreased.

* When the number of mini pucks decreases by 50 pucks or more during game operation due to loss or other reasons, the 4-digit score in the left side score LED blinks while the machine is in the standby state to inform that the number of mini pucks has decreased.

Setting item selection display (Mini puck low warning ON/OFF)

- 1** In this Setting Item Selection Mode, "PC-A" is displayed in the left side score LED and warning "on/off" and the mini puck decrease count is displayed in the right side score LED.
- 2** Press the Enter button (green). The right side score LED display blinks and the machine enters the Setting Change Mode.
- 3** In the Setting Change Mode, flip the Select switch up and down to change the setting.
 - The values that can be set are "oFF" (warning off) and "on" (warning on).
 - When set to "on", the right two digits of the right side score LED display the mini puck decrease count (number of mini pucks supplied to the playing field - number of mini pucks that have entered the goals). Values less than 0 are displayed as 0, and values greater than 99 are displayed as 99.
 - To reset the mini puck decrease count to 0, press the Service button (red) in the Setting Change Mode.
 - The mini puck decrease count is also reset to 0 when the setting value is changed from "on" to "oFF".

* The default setting (factory setting) is "on" (warning on).
- 4** Press the Enter button (green) again to return to the Setting Item Selection Mode.

NOTICE

- Make sure that there are ten mini pucks in each of the right and left sides of the mini puck stock area before resetting the mini puck decrease count. (See "7-8-7 S Hopper Motor ON/OFF Test and Sensor Check" on page 48.)
- Be sure to press the Service switch (red) and reset the mini puck decrease count to 0 when starting up the game for the first time or when adding mini pucks.

7-9-10 Error log

(1) Number of Errors Saved in Error Log Display Mode

Setting item selection display (Error log)

- 1** In this Setting Item Selection Mode, "ErrL" is displayed in the left side score LED and the number of errors saved in the error log is displayed in the right side score LED.
- 2** Press the Enter button (green) to enter the Error Log Contents Display Mode that displays the errors saved in the error log.
 - * The default setting (factory setting) is "0".
 - * The machine can save up to twenty error log entries.

7-9-16 Return all settings to default settings (factory settings)

Setting item selection display (Return all settings to default settings (factory settings))

- 1** In this Setting Item Selection Mode, “AdEF” is displayed in the left side score LED and a value indicating whether the settings are the same as the default settings (factory settings) is displayed in the right side score LED.
 - The right side score LED displays “0” when the setting values are the default settings (factory settings), or “1” when there are settings other than the default settings (factory settings).
- 2** Press the Enter button (green). The value in the right side score LED starts to blink.
- 3** If the Service switch (red) is pressed while the value in the right side score LED is blinking, all settings are returned to the default settings (factory settings) and the value changes to “0”.
- 4** If the Enter button (green) is pressed while the value in the right side score LED is blinking, the value stops blinking and the machine returns to the Setting Item Selection Mode.

* The error log and the mini puck decrease count are also cleared.

7-10 Mini Puck Low Warning and Adding Mini Pucks

7-10-1 Mini Puck Low Warning

When the mini puck low warning ON/OFF setting mode is set to ON and the number of mini pucks decreases by 50 or more, the 4-digit score in the left side score LED (signboard) blinks while the machine is in the standby state.

- When this blinking is confirmed, add mini pucks.

7-10-2 Adding Mini Pucks

When the mini puck low warning is displayed or the number of mini pucks is otherwise confirmed to have decreased, follow the procedure below to add mini pucks.

- 1 Block the goals so that mini pucks cannot enter.
- 2 Use Test mode and release all of the mini pucks to the playing field. (See “7-8-7 S Hopper Motor ON/OFF Test and Sensor Check” on page 48.)
- 3 Count the number of mini pucks, and add mini pucks so that there is a total of 120 pucks.
- 4 Unblock the goal (L) so that the mini pucks can enter.
- 5 Put the mini pucks into the goal (L).

- Put the mini pucks into the goal (L) one to three pucks at a time. If many pucks are put into the goal at once, the pucks may become jammed inside the machine and prevent normal operation.
 - Be sure to put the mini pucks into the goal (L).
- 6 Reset the decrease count of the mini puck low warning to “0”. (See “7-9-9 Mini puck low warning ON/OFF” on page 60.)

7-11 Daily Cleaning

7-11-1 Cleaning the Playing Field

NOTICE

- Be careful not to scratch the playing field when cleaning.
- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.
- Do not use wax or other substances that may block the air holes. The pucks will not slide well.
- If the air holes in the playing field become blocked by dust or dirt, the pucks will not slide well. Periodically clean the air holes in the playing field.

- 1** Wipe away any dirt using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.

- 2** Wipe dry so that no detergent or water remains, and then allow to dry thoroughly.

- 3** When the air holes are clogged with dust or dirt, insert a paper clip or other pin-like object into the air holes and remove the dirt.

NOTICE

- Check the air holes by sliding a puck over the playing field in the condition with the blower fan rotating. If the puck does not slide well, remove any dust and dirt from the air holes.

7-11-2 Cleaning the Goal Covers and Corner Covers

- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.

- 1 Wipe away any dirt using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.

- 2 Wipe dry so that no detergent or water remains, and then allow to dry thoroughly.

7-11-3 Cleaning the Pucks and Mallets

- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.

- 1 Wipe away any dirt using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.

- 2 Wipe dry so that no detergent or water remains, and then allow to dry thoroughly.

Assembly

15 Lead out and connect the two connectors through the holes, and secure them with the coating clips.

- Store the excess harness length below the holes so that there is no slack in the connected connectors and harnesses above the holes.

16 Temporarily secure the goal (L) assembly with the two flange socket bolts (M5 x 16) removed in step **6** and four flange socket bolt (M5 x 10).

- When installing, be sure to use bolts of the specified length.
- When installing, be careful not to pinch the connectors.

17 Follow the same procedure as steps **14** to **16** to temporarily secure the goal (R) assembly.

Test Mode

Troubleshooting

8A. Installation and Assembly

- Must be performed by a technician -

- 18** Set the corner covers (red • L, red • R, blue • L and blue • R) on the respective corners of the cabinet, and secure them with two button head bolts (M6 x 40), one button head bolt (M6 x 25) and three flat washers (M6) each.

NOTICE

- If the bolts are difficult to tighten, loosen the screws fixing the goal bumper (L) • (R) and corner bumper, shift each bumper towards the outside of the table, and then tighten the screws.
- If any of the bumper fixing screws are loose, tighten the screws.
- When installing, be careful not to pinch the harnesses and connectors.

- 19** Tighten the bolts temporarily secured in steps **16** and **17**, and secure the goal (L) and (R) assemblies.
- 20** Close the goal (L) assembly. (See “7-5-3 Opening and Closing the Goal (L) and (R) Assemblies” on page 38.)

- Must be performed by a technician -

- 8A
- 8B
- 9
- 10
- 11
- 12

Assembly

21 Connect the connector, and place the goal cover (RED) on the goal (L) assembly.

22 Attach the goal cover (RED) with two Torx bolts (M5 x 16) and two flat washers (M5), and with two Torx bolts (M5 x 20) and two flat washers (M5).

● When installing, be sure to use bolts of the specified length.

23 Open the goal (L) assembly. (See "7-5-3 Opening and Closing the Goal (L) and (R) Assemblies" on page 38.)

Test Mode

Troubleshooting

8A. Installation and Assembly

- Must be performed by a technician -

- 24** Secure the goal cover (RED) with two Torx bolts (M5 x 8).

- 25** Follow the same procedure as steps **20** to **24** to install the goal (R) assembly and goal cover (BLUE).
- 26** Close the goal (L) and (R) assemblies. (See "7-5-3 Opening and Closing the Goal (L) and (R) Assemblies" on page 38.)

8A. Installation and Assembly

- Must be performed by a technician -

[If the goal (L) and (R) assembly locks are stiff, cannot be locked, or are loose, perform the procedure below.]

27 Remove the goal cover of the goal to be adjusted by reversing the procedure in steps **21** to **26**.

28 Loosen the four Phillips pan head screws (with flat and spring washers) (M4 x 10).

Phillips pan head screw (with flat and spring washers) (M4 x 10) (loosen)

Goal outer beam

29 Shift the goal outer beam toward you until it stops, and then retighten the four Phillips pan head screws (with flat and spring washers) (M4 x 10) secure it.

*If the lock is stiff, shift the goal outer beam toward the back slightly before securing it.

30 Follow the procedure in steps **20** to **26** to reinstall the goal cover.

- 12

Assembly

- 3** Insert the center guard into the center guard brackets (A) and (B), and then secure it with three button head bolts (M6 x 16) and three flat washers (M6).
*Install the center guard so that the center guard retainer is facing the L side.

- 4** Insert the hooks of the net S frame (L) into the cabinet (L) assembly, and then secure it with four button head bolts (M6 x 50) and four flat washers (ø16 for M6).

Test Mode

Troubleshooting

8A. Installation and Assembly

- Must be performed by a technician -

- 5** Follow the same procedure in step **4** to attach the net S frame (R) to the cabinet (R) assembly.
- 6** Insert the hooks of the net L frame (L) into the cabinet (L) assembly, and then secure it with three button head bolts (M6 x 50), three flat washers ($\varnothing 16$ for M6), and one flange socket bolt (M5 x 35).

8A. Installation and Assembly

- Must be performed by a technician -

7 Follow the same procedure in step **6** to attach the net L frame (R) to the cabinet (R) assembly.

8 Attach the triangle bracket with five button head bolts (M5 x 16) and five flat washers (M5).

(3) Installing the Blower Fan

1 Remove the front door. (See "8A-5-1 Opening and Closing the Front Doors" on page 107.)

2 Insert the blower mounting plate into the blower brackets (L) and (R) from the goal (L) side, and secure it with four flange socket bolts (M5 x 30) and four flat washers (ø24 for M5).

3 Connect the connector.

4 Reattach the front door. (See "8A-5-1 Opening and Closing the Front Doors" on page 107.)

8A-2-2 Level Adjuster Adjustment

WARNING

- Adjust the level adjusters so that the table casters are at a height of approximately 5 mm from the floor. (The casters should be able to turn freely.) If the machine is unstable, it may move during game play.

NOTICE

- Adjust the level adjusters so that the table top surface is level. If the table top surface is tilted excessively, it may be difficult to collect the pucks and the machine may not function properly.

- 1** Install the table in accordance with “5-1 Installation Conditions” on page 24.
- 2** Adjust the level adjusters (four locations) so that the table casters are at a height of approximately 5 mm from the floor.
- 3** Secure the level adjusters with the lock nuts.

- Must be performed by a technician -

8A-2-3 Assembling the Side Tower Assembly

- 1** Attach the signboard with eight Torx bolts (M5 x 12).

- 2** Remove the wing bolt (M4 x 6), slide the S bucket and S hopper cover toward the outside, and remove them.
- 3** Remove the wing bolt (M4 x 6), slide the L bucket and L hopper cover toward the outside, and remove them.

Troubleshooting

8A. Installation and Assembly

- Must be performed by a technician -

- 23** Attach the side tower assembly with 2 countersunk cap bolts (M5 x 35), 4 button head bolts (M5 x 35).

- 24** Tighten the four Phillips pan head screws (with flat and spring washers) (M4 x 35).
- 25** Tighten the four Phillips pan head screws (with flat and spring washers) (M4 x 10).

- 26** Reattach the rear panel. (See "8A-5-3 Opening and Closing the Rear Panel" on page 108.)
- 27** Go to step **8**.

- Must be performed by a technician -

8A-2-6 Preparing the Pucks and Mallets

1 Place the mallets on the corner covers.

2 Put 50 of each of the big pucks and mini pucks (green, pink, orange) into the goal (L).

- Put the pucks into the goal (L) one to three pucks at a time. If many pucks are put into the goal at once, the pucks may become jammed inside the machine and prevent normal operation.
- Be sure to put the pucks into the goal (L) side.
- Do not put 60 or more big pucks or a total of 160 or more mini pucks of any color into the machine. Doing so may cause a malfunction.

⚠ WARNING

- Be sure to install the ground wire. Failure to install the ground wire may result in electric shock in the event of electrical leakage.

- 1** Insert the socket side of the power cord into the power supply input socket of the cordbox assembly.

- 2** Insert the power cord plug into an outlet.

8A-4 Checks after Installation

After installation is complete, test each item in the Test mode, and set the necessary items in the Setting mode. (See "7-8 Test Mode" on page 41 and "7-9 Setting Mode" on page 51.)

NOTICE

- After installation is complete, be sure to perform the puck supply operation to add pucks into the machine. (See "L Hopper Motor ON/OFF Test and Sensor Check" on page 47 and "7-8-7 S Hopper Motor ON/OFF Test and Sensor Check" on page 48.)
- After adding mini pucks into the machine, check that there are ten mini pucks in each of the right and left sides of the mini puck stock area, and then be sure to reset the mini puck decrease count. (See "7-9-9 Mini puck low warning ON/OFF" on page 60.)

- Must be performed by a technician -

8A-5 Opening and Closing Doors

8A-5-1 Opening and Closing the Front Doors

- 1 Remove the two Torx bolts (M5 x 35), and remove the front door on the side to be opened.

- 2 To install, perform the procedure in reverse.

8A-5-2 Opening and Closing the Service Doors L and R

- 1 Remove the two Torx bolts (M5 x 35).
- 2 Use the supplied service key to unlock, and remove the service door L or service door R.

- Must be performed by a technician -

8B. Service - Must be performed by a technician -

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before performing service work (such as repairs or correcting malfunctions).

8B-1 Inspection and Service

WARNING

- Perform periodic service. Failure to perform service may result in an accident.

8B-1-1 Inspection Items

Check the following inspection items periodically for any abnormalities.

- (1) Level Adjuster Inspection
 - Check that the level adjusters are fixed securely. (See "8A-2-2 Level Adjuster Adjustment" on page 90.)
- (2) Power Cord Plug Inspection
 - Check that the power cord is firmly inserted into the power outlet in the machine's cord box.
 - Clean any dust or other dirt from the connection parts.
 - Check for cracks or dirt on the power cord covering. If there is any abnormality on the power cord, be sure to replace it.
- (3) Screw Looseness Inspection

Check the following parts for loose screws. Fully retighten any loose screws.

 - Corner covers and goal covers (See "8A-2-1 (1) Assembling the Table, Goals and Corner Covers" on page 75.)
 - Net L and S, center guard, and side wall (See "8A-2-1 (2) Installing the Nets" on page 86.)
 - Goal bumpers (L) and (R), bumpers S (L) and (R), bumper L, and corner bumpers

8B-1-2 Cleaning the Puck Paths

(1) Cleaning the Insides of the Goal (L) and (R) Assemblies

The description below explains how to clean the (L) side. Follow the same procedure to clean the (R) side.

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.

- 1** Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
- 2** Open the goal (L) assembly. (See “7-5-3 Opening and Closing the Goal (L) and (R) Assemblies” on page 38.)
- 3** Wipe away any dirt from the puck paths using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.

- 4** Wipe dry using a soft cloth so that no water or detergent remains, and then allow to dry completely.
- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

(2) Cleaning the Rail (L) and (R) Assemblies

The description below explains how to clean the (L) side. Follow the same procedure to clean the (R) side.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the rail (L) assembly by reversing the installation procedure. (See steps **5** - **9** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Wipe away any dirt from the puck paths using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.
* Use a cotton swab to clean narrow parts.

(3) Cleaning the Insides of the L and S Buckets (Hopper Assembly)

⚠ WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- Do not perform the following operations. Doing so may cause pucks to jam or other malfunctions.
 - Rotating the L hopper disk in the clockwise direction as viewed from above.
 - Rotating the S hopper disk in the counter-clockwise direction as viewed from above.
- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly. (See "8B-4-4 (1) Removing and Installing the Side Tower Assembly" on page 145.)
- 3** Remove any pucks from inside the L and S buckets.

- 4** Wipe away any dirt from the puck paths using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.
 - * Use a cotton swab to clean narrow parts.
- 5** Wipe dry using a soft cloth so that no water or detergent remains, and then allow to dry completely.
- 6** To install, perform the procedure in reverse.

- Must be performed by a technician -

(4) Cleaning the Hopper Disks and Hopper Bottoms (Hopper Assembly)

The description below explains how to clean the S hopper disk. Follow the same procedure to clean the L hopper disk.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- Do not perform the following operations. Doing so may cause pucks to jam or other malfunctions.
 - Rotating the L hopper disk in the clockwise direction as viewed from above.
 - Rotating the S hopper disk in the counter-clockwise direction as viewed from above.
- Do not use thinner, benzene, gasoline, alcohol or other organic solvents. This may degrade the materials.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly. (See "8B-4-4 (1) Removing and Installing the Side Tower Assembly" on page 145.)
- 3** Remove any pucks from inside the S bucket.
- 4** Remove the wing bolt (M4 x 6), slide the S hopper cover toward the outside, and remove it.

8B. Service

- Must be performed by a technician -

- 5** Remove the cord clip and disconnect the two connectors.
- 6** Loosen the four pan head screws (with flat and spring washers) (M4 x 10), and remove the S hopper motor bracket.

- 7** Remove the three pan head screws (with flat and spring washers) (M4 x 10), and remove the disk top.

- 8** Remove the pan head screw (with flat and spring washers) (M4 x 10), and remove the hopper spring base.

- Must be performed by a technician -

- 9** Remove the two pan head screws (with flat and spring washers) (M4 x 10), and remove the disk retainer bracket. (Perform this step only for the S hopper disk.)

- 10** Remove the E-ring (nominal diameter: 10), and remove the flat washer (M12) and the S hopper disk.

- 11** Wipe away any dirt from the puck paths using a soft cloth moistened with water or a neutral cleanser diluted with water and then firmly wrung out.
- 12** Wipe dry using a soft cloth so that no water or detergent remains, and then allow to dry completely.
- 13** To install, perform the procedure in reverse.

- When installing, press the hopper motor bracket toward the hopper disk so that the hopper gear and hopper disk teeth mesh properly.

8B-1-3 Removing Jammed Pucks

- Check that pucks are not damaged or deformed before putting them back into the machine. Otherwise, the pucks may jam again.

(1) Inside the Goal (L) or (R) Assembly

The description below explains how to remove jammed pucks from the (L) side. Follow the same procedure to remove jammed pucks from the (R) side.

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
- 2** Open the goal (L) assembly. (See “7-5-3 Opening and Closing the Goal (L) and (R) Assemblies” on page 38.)
- 3** Remove the jammed puck.
- 4** To install, perform the procedure in reverse.

(2) In case of the rail (L)/(R) assembly

The description below explains how remove jammed pucks from the (L) side. Follow the same procedure to remove jammed pucks from the (R) side.

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
- 2** Remove the rail (L) assembly by reversing the installation procedure. (See steps **5** - **9** of “8A-2-5 Installing the Side Tower Assembly” on page 96.)
- 3** Remove the jammed puck.
- 4** To install, perform the procedure in reverse.

- Must be performed by a technician -

(3) Inside the Corner Rail (L) or (R)

The description below explains how to remove jammed pucks from the (L) side. Follow the same procedure to remove jammed pucks from the (R) side.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Open the service door L. (See "8A-5-2 Opening and Closing the Service Doors L and R" on page 107.)
- 3** Insert a rod (wrench, etc.) into the gap of the corner outer R (L), and remove the jammed puck.

[If the jammed puck cannot be removed by the above procedure, perform the procedure below.]

- 4** Remove the rail (L) assembly by reversing the installation procedure. (See steps **5** - **9** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 5** Remove the two wing bolts (M4 x 10), and remove the corner rail cover (L).
- 6** Open the corner outer R (L) slightly, insert a rod (wrench, etc.) into the gap, and remove the jammed puck.
- 7** To install, perform the procedure in reverse.

- Must be performed by a technician -

(4) Inside the L or S Bucket (Hopper Assembly)

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly. (See "8B-4-4 (1) Removing and Installing the Side Tower Assembly" on page 145.)
- 3** Remove any pucks from inside the L or S bucket, and then remove the jammed puck.
- 4** To install, perform the procedure in reverse.

(5) Inside a Hopper Disk or Hopper Bottom (Hopper Assembly)

The description below explains how to remove jammed pucks from the S hopper disk. Follow the same procedure to remove jammed pucks from the L hopper disk.

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

Do not perform the following operations. Doing so may cause pucks to jam or other malfunctions.

- Rotating the L hopper disk in the clockwise direction as viewed from above.
- Rotating the S hopper disk in the counter-clockwise direction as viewed from above.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly. (See "8B-4-4 (1) Removing and Installing the Side Tower Assembly" on page 145.)
- 3** Remove the S hopper disk. (See steps **3** - **10** of "8B-1-2 (4) Cleaning the Hopper Disks and Hopper Bottoms (Hopper Assembly)" on page 113.)
- 4** Remove the jammed puck.
- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

(6) In case of S Escalator Assembly

The description below explains how to remove jammed pucks from the L side. Follow the same procedure to remove jammed pucks from the R side.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the rear panel. (See "8A-5-3 Opening and Closing the Rear Panel" on page 108.)
- 3** Remove the four Hex nuts with flange (M4), disconnect the connector, and remove the joint rail cover L.

- 4** Remove the jammed puck.

- 5** To install, perform the procedure in reverse.

(7) In case of L Escalator Assembly

⚠ WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the rear panel. (See "8A-5-3 Opening and Closing the Rear Panel" on page 108.)
- 3** Disconnect the connector.
- 4** Remove the four Hex nuts with flange (M4), loosen the two Hex nuts with flange (M4), and remove the L rail (H) cover.

- 5** Remove the jammed puck.
- 6** To install, perform the procedure in reverse.

- Must be performed by a technician -

(8) In case of the Slider Assembly

! WARNING

● To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the cover panel. (See steps **2** - **4** of "8B-1-2 (5) Cleaning the S Slider Assembly" on page 116.)

8B-1-4 Adding Big Pucks

WARNING

● To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
- 2** Open the service door R. (See “8A-5-2 Opening and Closing the Service Doors L and R” on page 107.)
- 3** Count the number of big pucks inside the L bucket.

- 4** Add big pucks so that there are 20 to 30 big pucks inside the L bucket.
- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

8B-2 Error Display (for Technicians)

8B-2-1 Display when an Error Occurs

When an error occurs, "Err" is displayed in the left side score LED, and the error number is displayed in the right side score LED. The same error number is displayed as a binary value in the time LED.

Signboard display (when error number = 6)

- Before checking for a malfunction, first make sure that all the connectors are connected securely.

8B-2-2 Resolving Errors

Error number	Error name	Cause	Action	Reference page

8B-3 Troubleshooting

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.
- If the problem is not described in "8B-3 Troubleshooting" or the problem persists despite taking the appropriate action, turn off the power switch immediately to stop operation, and contact your distributor. Continuing operations may result in an accident.

NOTICE

- Before checking for a malfunction, first make sure that all the connectors are connected securely.
- Never perform a conductivity check of the boards with a tester or any other tool. The IC may be damaged by the internal voltage of the tester.
- When sending parts for repair, be sure to pack them properly. Particularly when sending the main PC board, wrap the part in sponge or air bubble wrapping before packing it in a cardboard box to make sure that the part is not exposed to external force.

- Must be performed by a technician -

8B-3-1 Overall

Symptom	Main cause	Action	Reference page
The machine does not start even when the power switch is turned on.	The power cord is disconnected from the outlet or the machine, or is not connected securely.	<ul style="list-style-type: none"> Connect the power cord correctly and securely. Turn on the power switch again. 	Page 106
	The PCB base is not installed correctly.	Install the PCB base correctly.	Page 146
	Main PC board malfunction.	Replace the main PC board.	Page 146
	Switching regulator malfunction.	Replace the switching regulator.	Page 148
Operation is not stable.	The power supply voltage is not within the range of AC 110 V to 130 V (or 210 V to 230 V).	Disconnect any high-capacity devices (such as an air conditioner or large machine) from the same line to secure the specified power supply voltage.	—
The power turns off during operation.	<p>The circuit protector has operated to turn off the power switch.</p> <p>*The circuit protector turns off the current when an abnormal current occurs.</p>	<p>Turn on the power switch again.</p> <p>If the circuit protector operates frequently, there is a mechanical abnormality.</p> <p>Contact your distributor.</p>	—

8B-4 Removing, Installing and Replacing Assemblies and Parts

8B-4-1 Table

(1) Removing and Installing the Goal (L) and (R) Assemblies

The description below explains how to remove and install the L side. Follow the same procedure to remove and install the R side.

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

CAUTION

- When lifting up the goal (L) or (R) assembly, be sure to perform the work with two or more people.

- 1 Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2 Remove the two button head bolts (M6 x 40), one button head bolt (M6 x 25) and three flat washers (M6) from each corner cover.

- 3 Slide the corner covers toward the outside, and remove them.

NOTICE

- When removing and installing, be careful not to pinch the harness and connectors.

- 4 Open the goal (L) assembly. (See "7-5-3 Opening and Closing the Goal (L) and (R) Assemblies" on page 38.)

- Must be performed by a technician -

5 Disconnect the two connectors.

6 Remove the four flange socket bolts (M5 x 10) and two flange socket bolts (M5 x 16) from the right and left of the goal (L) assembly.

NOTICE

● When installing, be sure to use bolts of the specified length.

7 Close the goal (L) assembly. (See "7-5-3 Opening and Closing the Goal (L) and (R) Assemblies" on page 38.)

8 Lift the goal (L) assembly straight up with two people, and remove it.

(2) Removing and Installing the Rail (L) and (R) Assemblies

 **WARNING**

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
- 2** Remove the rail (L) and (R) assemblies by reversing the installation procedure. (See steps **5** to **14** of “8A-2-5 Installing the Side Tower Assembly” on page 96.)

- Must be performed by a technician -

(3) Replacing the Blower Fan

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Open the front door. (See "8A-5-1 Opening and Closing the Front Doors" on page 107.)
- 3** Disconnect the connector.
- 4** Remove the four flange socket bolts (M5 x 30) and the four flat washers (ø24 for M5).

- 5** Slide the blower mounting plate toward the left side, and remove it.

8B. Service

- Must be performed by a technician -

- 6** Remove the four flange socket bolt (M5 x 16), the four Flat washer($\varnothing 24$ for M5), and remove the blower fan from the blower fan mounting plate.

- 7** To install, perform the procedure in reverse.

- Must be performed by a technician -

8B-4-2 Goal (L) and (R) Assemblies

(1) Replacing the Goal (L) and (R) Sensors (Photosensor Side) and (Photo-emitter Side)

The description below explains how to replace the (L) side. Follow the same procedure for replacement of the (R) side.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the goal (L) assembly. (See "8B-4-1 (1) Removing and Installing the Goal (L) and (R) Assemblies" on page 136.)
- 3** Disconnect the two connectors of the goal (L) sensor (photosensor side) and (photo-emitter side).

- 4** Remove the two Hex nuts with flange (M3), and remove the goal (L) sensor (photosensor side) and (photo-emitter side).

- 5** To install, perform the procedure in reverse.

8B-4-3 Rail (L) and (R) Assemblies

(1) Replacing the Rail (L) and (R) Sensors (Upper) and (Middle)

The description below explains how to replace the (L) side. Follow the same procedure for replacement of the (R) side.

⚠ WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the rail (L) assembly by reversing the installation procedure. (See steps **5** - **9** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Disconnect the two connectors of the rail (L) sensor (upper) and (middle).
- 4** Remove the two Hex nuts with flange (M3), and remove the rail sensor bracket (B).

- Must be performed by a technician -

5 Remove the two pan head screws (M3 x 6), and remove the rail (L) sensors (upper) and (middle).

The description below explains how to replace the (L) side. Follow the same procedure for replacement of the (R) side.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the rail (L) assembly. Reverse the installation procedure. (See steps **5** to **9** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Disconnect the connector of the rail (L) sensor (lower).
- 4** Remove the two Hex nuts with flange (M3), and remove the rail sensor bracket (A).

- 5** Remove the pan head screw (M3 x 6), and remove the rail (L) sensor (lower).

- 6** To install, perform the procedure in reverse.

- Must be performed by a technician -

8B-4-4 Side tower assembly

(1) Removing and Installing the Side Tower Assembly

! WARNING

● To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly by reversing the installation procedure. (See steps **2** - **16** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)

(3) Replacing the Switching Regulator

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- PC boards are sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling a PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Pull out the PCB base. (See "8B-4-4 (2) Replacing the Main PC Board" on page 146.)
- 3** Disconnect the connectors (two in case of 12 V, three in case of 24 V) of the switching regulator to be replaced.

- 4** Unlock the four spacer locks, and replace the switching regulator.
- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

(4) Replacing the SSR

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Pull out the PCB base. (See "8B-4-4 (2) Replacing the Main PC Board" on page 146.)
- 3** Disconnect the four Faston terminals.

- 4** Remove the two pan head screws (with spring washer) (M4 x 16), and remove the SSR.
- 5** To install, perform the procedure in reverse.

NOTICE

- The SSR has a polarity. The numbers indicated in the figure are marked on the SSR, so be careful and install the SSR with the correct alignment.
- When installing, be careful not to mix up the Faston terminal colors.

8B-4-5 Hopper assembly

(1) Replacing the L Hopper Motor

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly by reversing the installation procedure. (See steps **2** - **15** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Remove the wing bolt (M4 x 6), and remove the L hopper cover.

- 4** Remove the cord clip and disconnect the connector.

- Must be performed by a technician -

- 5** Loosen the four pan head screws (with flat and spring washers) (M4 x 10), and remove the L hopper motor bracket.

- 6** Disconnect the connector.

- 7** Remove the encoder bracket. (See the step **3** of "8B-4-5 (2) Replacing the L Hopper Motor Sensor" on page 154.)

- 8** Remove the two double points (M4 x 10), and remove the L hopper gear.

8B. Service

- Must be performed by a technician -

- 9 Remove the four Phillips pan head screws (with flat and spring washers) (M5 x 40), and replace the L hopper motor.

- 10 To install, perform the procedure in reverse.

NOTICE

- When installing, align the lower surface of the hopper gear with the tip of the motor shaft.

- When installing, install so that the double points are perpendicular to the flat surfaces of the motor shaft.

- When installing, press the hopper motor bracket toward the hopper disk so that the hopper gear and hopper disk teeth mesh properly.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the L hopper motor bracket. (See steps **2** - **6** of "8B-4-5 (1) Replacing the L Hopper Motor" on page 150.)
- 3** Remove the Phillips pan head screw (with flat and spring washers) (M4 x 10), and remove the encoder bracket.

- 4** Release the lock, and replace the L hopper motor sensor.

- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

(3) Replacing the S Hopper Motor

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly by reversing the installation procedure. (See steps **2** - **15** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Remove the wing bolt (M4 x 6), slide the S hopper cover toward the outside, and remove it.

- 4** Remove the cord clip and disconnect the two connectors.
- 5** Loosen the four pan head screws (with flat and spring washers) (M4 x 10), and remove the S hopper motor bracket.

8B. Service

- Must be performed by a technician -

6 Remove the encoder bracket. (See the step **3** of “8B-4-5 (4) Replacing the S Hopper Motor Sensor” on page 158.)

7 Remove the two set screws (M4 x 10), and remove the S hopper gear.

8 Remove the four Phillips pan head screws (with flat and spring washers) (M5 x 8), and replace the S hopper motor.

- Must be performed by a technician -

9 To install, perform the procedure in reverse.

- When installing, align the bottom surface of the hopper gear with the tip of the motor shaft.

- When installing, install so that the double points are perpendicular to the flat surfaces of the motor shaft.

- When installing, press the hopper motor bracket toward the hopper disk so that the hopper gear and hopper disk teeth mesh properly.

⚠ WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the S hopper motor bracket. (See steps **2** - **5** of "8B-4-4 (3) Replacing the S Hopper Motor" on page 155.)
- 3** Remove the Phillips pan head screw (with flat and spring washers) (M4 x 10), and remove the encoder bracket.

- 4** Release the lock, and replace the S hopper motor sensor.

- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

(5) Replacing the S Hopper Motor Driver PC Board

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- PC boards are sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling a PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly by reversing the installation procedure. (See steps **2** - **15** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Remove the one wing bolt (M4 x 6) each, and remove the L hopper cover and the S hopper cover.

8B. Service

- Must be performed by a technician -

- 4** Disconnect the four connectors, remove the four Phillips pan head screws (with flat and spring washers) (M4 x 25), and replace the S hopper motor driver PC board.

- 5** To install, perform the procedure in reverse.

- Must be performed by a technician -

8B-4-6 Slider Assembly

(1) Replacing the Stopper Solenoids (L) and (R)

The description below explains how to replace the (L) side. Follow the same procedure for replacement of the (R) side.

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the rear panel. (See "8A-5-3 Opening and Closing the Rear Panel" on page 108.)
- 3** Disconnect the connector, remove the four Hex nuts with flange (M4) and two Phillips pan head screws (with flat and spring washers) (M4 x 10), loosen the two Hex nuts with flange (M4), and remove the L rail (H).

(1) Replacing the Time LED (Time LED PC Board)

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- PC boards are sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling a PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

- 1 Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
- 2 Remove the side tower assembly by reversing the installation procedure. (See steps **2 - 15** of “8A-2-5 Installing the Side Tower Assembly” on page 96.)
- 3 Remove the eight Torx bolts (M5 x 12), and remove the signboard.

- 4 Disconnect the connector, remove the five Phillips pan head screws (with flat and spring washers) (M4 x 10), and replace the time LED (time LED PC board).

- Must be performed by a technician -

- 5** To install, perform the procedure in reverse.

(2) Replacing the Score LED (Score LED PC Board)

! WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

NOTICE

- PC boards are sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling a PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.

- 1** Turn off the power switch. (See "7-6-1 Turning the Power Switch On" on page 39.)
- 2** Remove the side tower assembly by reversing the installation procedure. (See steps **2** - **15** of "8A-2-5 Installing the Side Tower Assembly" on page 96.)
- 3** Disconnect the two connectors, remove the six Phillips pan head screws (with flat and spring washers) (M4 x 10), and replace the score LED (score LED PC board).

- 4** To install, perform the procedure in reverse.

- Must be performed by a technician -

8B-4-10 Illuminator assembly

(1) Replacing the Circle LED

The description below explains how to replace the L side. Follow the same procedure for replacement of the R side.

WARNING

- To avoid electric shock, accidents or injuries to yourself or other people, or damage to the electronic circuits, be sure to turn off the power switch before starting work.

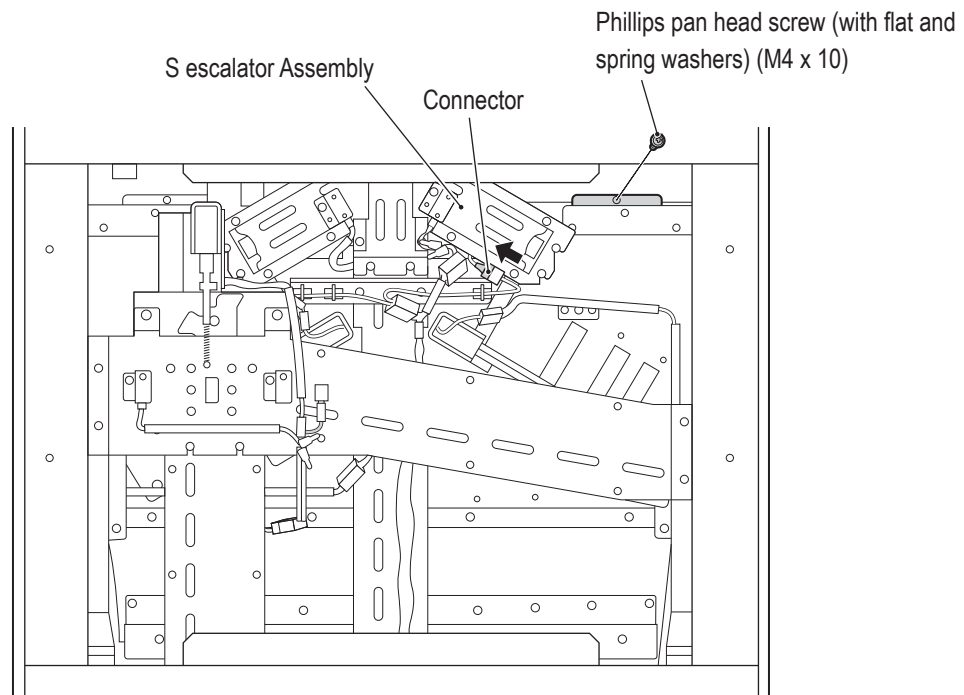

NOTICE

- PC boards are sensitive to static electricity. If a person handles a PC board while charged with static electricity, the parts on the PC board may be damaged. Before handling a PC board, discharge the static electricity from your body; for example, by touching the surface of grounded metal.
 - When installing, be careful not to pinch the harnesses and connectors.
- 1** Turn off the power switch. (See “7-6-1 Turning the Power Switch On” on page 39.)
 - 2** Remove the side tower assembly by reversing the installation procedure. (See steps **2** - **15** of “8A-2-5 Installing the Side Tower Assembly” on page 96.)
